Chinese Whispers - An Efficient Graph Clustering Algorithm

The article was written by (Biemann [2006](#)). It was cited [303](#) times according to Google Scholar. The task performed was graph-clustering. They used x metric over x.

Hypothesis

A randomized graph-clustering algorithm would perform well of small worlds.

Evidence and Results

Dataset

The dataset used are all from the natural language processing world.

Results

Contribution

The authors propose

Small world graphs

Controversial Ideas

Weaknesses

Future Work
